IN-HOUSE SERVICES

ELECTRICAL GLOVE TESTING

Free Pickup and Delivery | Test Result Certificate | Gloves in Sealed Plastic Packaging

01 | FREE PICKUP & WASHING

Picked up from the location of your choosing. We just need the quantity and class ratings of the KV gloves to be tested. Our first step, we clean the gloves of any debris from wear.

02 | AIR & VOLT TESTED

Tested to align with the Class Rating of the glove for the appropriate amount of time. There is no "grey area", it's either pass or fail, if the glove doesn't pass 100%, then it fails.

03 | DATE STAMPED

All electrical gloves must be tested prior to use. Once in use they must be tested every 6 months per last testing. We provide a date stamp indicating when last testing was performed.

04 | FREE DELIVERY

Gloves that have passed inspection/testing are packed and shipped out on the first available run.

WE CAN TEST ITEMS CLASS 00 – CLASS 4

4"	12,000	9,600	24,000	20,800	17,000	12,000

ALWAYS

- Store and handle webbing slings correctly.
- Inspect slings and accessories before use and before placing in storage.
- Position the bight for choke lift at 120 (natural angle).
- Position the sling so that the load is uniformly spread over its width and protect the sling from sharp edges.
- Apply the correct mode factor for the slinging arrangement.

NEVER

- Attempt to shorten, tie or knot webbing slings
- Expose webbing slings to direct heat or flames
- Expose webbing slings to chemicals without consulting the supplier
- Shock load webbing slings
- Use webbing slings which are cut or have loose or damaged stitching
- Use a sling with missing/damaged label or illegible markings

IN-SERVICE INSPECTION AND MAINTENANCE

Maintenance requirements are minimal. Webbing slings may be cleaned with clear water. Remember weak chemical solutions will become increasingly stronger by evaporation. Before each use inspect webbing slings and in the event of the following defects, refer the sling to a competent person for thorough examination: illegible markings; damaged, chafed or cut webbing; damaged or loose stitching; heat damage; burns; chemical damage; solar degradation; damaged or deformed end fittings

Ball Bearing Swivel Hook w/ Latch

CROSBY ITEM: L3322B

- Alloy Ball Bearing
- Low profile hook tip with latch
- Bearing allows hook to rotate freely under load
- **Deformation Indicators:** Two strategically placed marks, one just below the shank or eye and the other on the hook tip, which allows for a QUIC-CHECK measurement to determine if the throat opening has changed, thus indicating abuse or overload.
- **Angle Indicators:** Indicates the maximum included angle which is allowed between two sling legs in the hook. These indicators also provide the opportunity to approximate other included angles between two sling legs.

HEAT STRESS & DEHYDRATION

KEEPING UP WITH YOUR CREW'S HYDRATION IS VITAL TO WORK PERFORMANCE & EFFICIENCY AS WELL AS REDUCES THE RISK OF DEHYDRATION-RELATED ILLNESS & ACCIDENTS.

THE HUMAN BODY IS 60-70% WATER

Maintaining and balancing the body's fluid level is imperative. Many factors contribute to fluid loss such as: Sweating, Exhaling, Urination, Diuretic Intake and Maintaining Core Body Temperature.

HEAT INDEX & DANGERS

90°F - 100°F

Possible sunstroke, heat cramp and heat exhaustion with prolonged exposure and physical activity.

101°F - 129°F

Probable sunstroke, heat cramps and heat exhaustion and possible heat stroke with prolonged exposure and physical activity.

130°F+

Imminent heat stroke or sunstroke.

WATER & ELECTROLYTES

RECOMENDED WATER PER DAY

Men **13 cups** | Women **9 cups**

Water is necessary for proper hydration, but water alone will not replace lost nutrients and minerals such as electrolytes. Electrolytes consist of minerals such as **sodium**, **potassium**, **magnesium** and **calcium**, which are critical for cell and muscular function.

6-10 oz. every **15-20 minutes** during strenuous activity, especially in hot conditions or environments.
