

REUSABLE CONCRETE ANCHOR

- Stainless steel and aluminum construction
- Fits 3/4" holes
- Breaking Strength: 5,000lbs, 310lbs capacity
- Removable and reusable
- Can be used in many fall protection setups, horizontally and vertically.

EASY AND HASSLE FREE APPLICATION:

- **INSTALLATION:**
 1. Drill a 3/4" wide hole in the concrete.
 2. Squeeze the anchor so the spoons retract.
 3. Insert the anchor into the hole and release the trigger.
 4. Tug to fasten in place, and clip-in with a safety line.
- **REMOVAL:**
 1. Squeeze the anchor so the spring compresses and spoon releases.
 2. Pull anchor out of the concrete.
