

### Fiberglass Road Plate

The Fiberglass Road Plate is a modular system of singular linking units. HS20-44 rated, this road plate is suitable for 97,000 lb vehicles over a 18" wide trench.

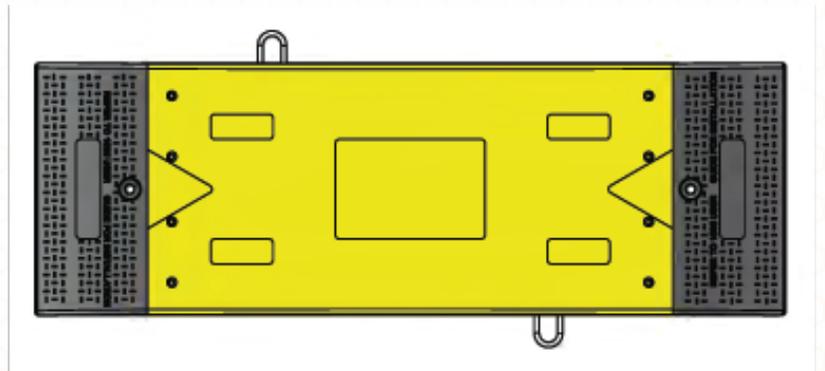

#### Usage Benefits

- Can be easily transported and stored
- Can be easily lifted and installed by 2 persons without a crane or heavy-lifting equipment  
Safely cover holes and trenches up to 28"
- Inner sections have gravity fed steel drop pins on the underside to prevent lateral movement
- Inner and end sections can be anchored
- Maintain quality and performance with spare parts, if necessary
- Molded hi-vis anti-skid surface and chamfered Flex-Edge reduces slips and falls, providing safety in roadways and at crosswalks
- Patented rubber Flexi-Edge deafens noise and eliminates need for cold patch
- Heavy duty interlocking steel connectors lock together to cover any length of trench
- Adhere to local DOT legislation, as this may effect the max. trench width requirements
